

IT APPLICATION ENGINEER (M/F/D).

The IT Application Engineer (m/f/d) is responsible for the design, implementation, extension and support of strategic INNIO's applications. In this role, you will promote simplification and standardization across a large technology ecosystem. You will define architectural principles and implement solutions to meet business requirements and the company's long-term strategy. Moreover, you will be responsible to support core application platforms by focusing in fixing issues, coordinating resolution, provide guidance to the team members and vendors.

Your Responsibilities:

- Consult with appropriate business teams to understand and define project requirements
- Design, plan and implement IT solutions while ensuring system productivity
- Advise as the technical expert for system upgrades, compatibility and integrations
- Maintain technical and functional documentation
- Coordinate and manage the backlog of IT issues, engaging and administering vendors when required
- Develop KPIs to define and measure success

Your Profile:

- Bachelor's Degree in Information Technology, related subjects or equivalent work experience
- Working knowledge with one of the following applications is valuable: PTC Windchill, PTC RV&S, 3DS Catia, PTC Creo, Salesforce, Middleware systems, Microsoft Power Platform
- Good working knowledge with relational databases, communication protocols and standards (SQL, SOAP, REST, XML, JSOL etc.)
- Knowledge of a programming language (e.g. Java and/or C#) and deployment methodologies is a plus
- Background in project management and business process optimizations is highly appreciated
- Efficient communication and documentation skills
- Ability to multitask, organize and prioritize

The base pay is composed of the amount according to the Austrian collective agreement which is at least EUR 3.310,48 gross per month (x 14) and an over payment depending on your qualifications and experience.
